Skills

Languages: C/C++, PHP, JavaScript, TypeScript, SQL

Technologies & Tools: AWS, MongoDB, Cloudinary, Mailtrap, SendGrid, Docker, ReactJS, ReactNative

Work Experience

IT BootCamp, Quaid Collage Lahore

May 2023 - Present

Instructor + Developer

- I have ability to teach the students because i teach students the backend and frontend programming technologies like Node.js, express.js, react.js, mongoDB and much more. I help of those students and persons who working on this field to get better at problem solving and coding.
- AWS, MongoDB, Cloudinary, Mailtrap, SendGrid, Docker, ReactJS, ReactNative

Natours tour booking application

- Create Natours, a cutting-edge tour booking application, with a robust API featuring essential MVC functionalities like filtering, sorting, and pagination. Design its frontend using HTML5, CSS3, Sass components, and animations with Pug template, providing a visually stunning and user-friendly interface. Built on Node.js, Express, and MongoDB, Natours promises seamless performance and scalability, all developed within VS Code for optimal efficiency.
- Node.js, Express, MongoDB, PUG Template

Doctor Appointment Booking Website

- Craft a dynamic doctor appointment booking platform with React.js, Node.js, MongoDB, and JWT authentication, complemented by an engaging user experience and modern design using Tailwind CSS and React animations. Seamlessly integrate Stripe payment gateway to facilitate secure transactions, ensuring convenience for patients and practitioners alike.
- Develop Using React.js, Node.js, Express.js, MongoDB, JWT, stripe payment gateway.
- Design UX/UI, React.js, Tailwindcss, and animations.

VenTureTech, Sheikhpura

Sept 2021 – May 2022

Web Development CMS (Blog posting site)

- Develop a versatile blog posting website with a user-friendly CMS and an intuitive admin panel using HTML, CSS, Bootstrap, and PHP. Empower content creators with easy-to-use tools while ensuring a visually appealing and responsive design for readers, all built on a robust PHP backend.
- PHP, MySQL, Html, Bootstrap

Education

BS in Computer Science

Aug 2019 - Jun 2023

GCU Faisalabad

Relevant Coursework: Object Oriented Programming, Databases, Discrete Math's, Data Structures and Algorithms, Operating Systems, Computer Networks, Machine Learning, Data Mining, Advance Data Structures and Algorithms, Information Retrieval, Image Processing

Project Work

Cloth management system (FYP)

Aug 2023 - Feb 2023

- Create an efficient cloth management system to streamline inventory tracking, sales, and customer management. Utilize a user-friendly interface and intuitive features for inventory management, sales tracking, and customer relationship management, enhancing overall operational efficiency. Built with scalability in mind, this system ensures seamless handling of cloth-related transactions and data management.
- Using PHP, MySQL, Bootstrap

Awards and Certificates

Udemy Courses: Helping students and working trainees to get better at problem solving and coding

- *React Native, Redux & Express – Full Stack React Native*
- *Node Express MongoDB BootCamp 2023*
- *React Next.js Node API AWS – Build Scaling MERN Stack App*
- *Build a Blockchain & Cryptocurrency | Full – Stack Edition*

Corvit – Navttc, Lahore:

- *Cloud Computing and networking*

VenTureTech Computer Education and IT Solutions, Sheikhpura:

- *I has the physically course web development from VenTureTech*
- *6 months of Internship in venturetech*

Aug 2021 - Sep 2022

Ali Husnain

Full Stack Developer

*I am writing to express my keen interest in the position of experienced frontend developer at your company. With my strong background in frontend technologies, particularly in Node.JS, I am confident that I would be a valuable asset to your team. Over the past 2 years, I have honed my skills in Node.js **development**, possessing a deep understanding of building an interactive user Backends. From crafting intricate UI components to optimizing performance, I have consistently delivered exceptional results throughout my career.*

As a frontend developer, I excel in collaborating with design teams to translate project requirements into elegant and user-friendly interfaces. I have a proven track record of successfully implementing design specifications while ensuring the scalability and maintainability of the codebase.

Moreover, my strong problem-solving skills and attention to detail have allowed me to troubleshoot and debug complex Backend issues efficiently. I am well-versed in conducting thorough testing and code reviews to ensure the reliability and performance of Full Stack applications.

Additionally, my experience in Agile methodologies, such as Scrum, has equipped me with the ability to work collaboratively in fast-paced environments, adapting to changing priorities and delivering results iteratively.

At your company, I am particularly drawn to the opportunity to work on challenging Backend projects and contribute to a team of talented professionals who share a passion for excellence. I believe that my technical expertise, combined with my dedication to continuous learning, would make me a valuable contributor to your team's success.

Thank you for considering my application. I would welcome the opportunity to discuss further how my Backend development skills and experience align with the goals of the company.

Thank you for your time and consideration.

SINCERELY,
